SOFTWARE SOLUTIONS & PARTNER PRODUCTS INTEGRATION

Enetel Solutions Group is a software development and consulting leader, focusing on creating products and facilitating digitalization in enterprises to enable growth.

Be it an innovative consumer app or a next-gen enterprise system – we do it all, from product ideation and concept development to system rollout and scale-up. We create software products and solutions to find new competitive advantages for our clients.

WE CONSULT WE CREATE WE DEVELOP.

We are not just a bunch of developers and technicians. We are a cross-functional team of seasoned ex-corporate business leaders and engineers from different industry verticals, with a significant diversity of domain knowledge and extensive life and business experience. Our passion is to help you thrive by managing complexity while focusing on what you do best.

THIS IS WHAT WE DO

CUSTOM SOFTWARE DEVELOPMENT

It's your interest that we put first! We help you transform and grow your business by developing solutions tailored to your customers' needs.

OUR PRODUCTS

Based on the needs of our clients and per the latest technological trends, we develop solutions that improve business and are easy to use.

PARTNER SOLUTIONS

A reliable partnership is the foundation of good cooperation. Therefore, we create and develop excellent relationships with top vendors, and shared knowledge and expertise are always available to our clients.

**OUR PASSION IS TO
MAKE OUR CLIENTS'
END-CUSTOMERS **HAPPY.****

THIS IS
HOW WE DO IT.

...

THIS IS HOW WE DO IT

CUSTOMER EXPERIENCE

In order to serve the customers of the future together, we must analyze, optimize, find synergies, constantly improve, be one step ahead, innovate. Cutting-edge technology and our cross-industry knowledge enable us to understand and manage increasing complexity, build intelligent and future-proof solutions.

ERP

A great customer experience starts with proper internal data management and accurate information about our business. When we have real-time information about our stock levels, products & services status, and all relevant data are integrated across our IT landscape, we have a good start.

CRM / BILLING

An exceptional customer experience is what drives loyalty and keeps the customer happy every time he receives an invoice. Finally, accurate billing is what seals the deal and completes the cycle of exceptional customer experience.

THIS IS HOW WE DO IT

OMNICHANNEL

Customers want a seamless experience online and offline. They expect to be engaged and entertained throughout the whole customer journey and share their opinion on social media. Complexity is the name of this game. Our omnichannel expertise combined with your knowledge will make it happen.

ECOMMERCE

There is hardly any business today that is not present online, and the global competition is on. How can you compete with the big fish? Simple. Regardless of the size of your business, all you need is a flexible and well-designed web shop, properly integrated with your resource management, your CRM, your communication tools, and social media.

THIS IS HOW WE DO IT

PROCESS AUTOMATION

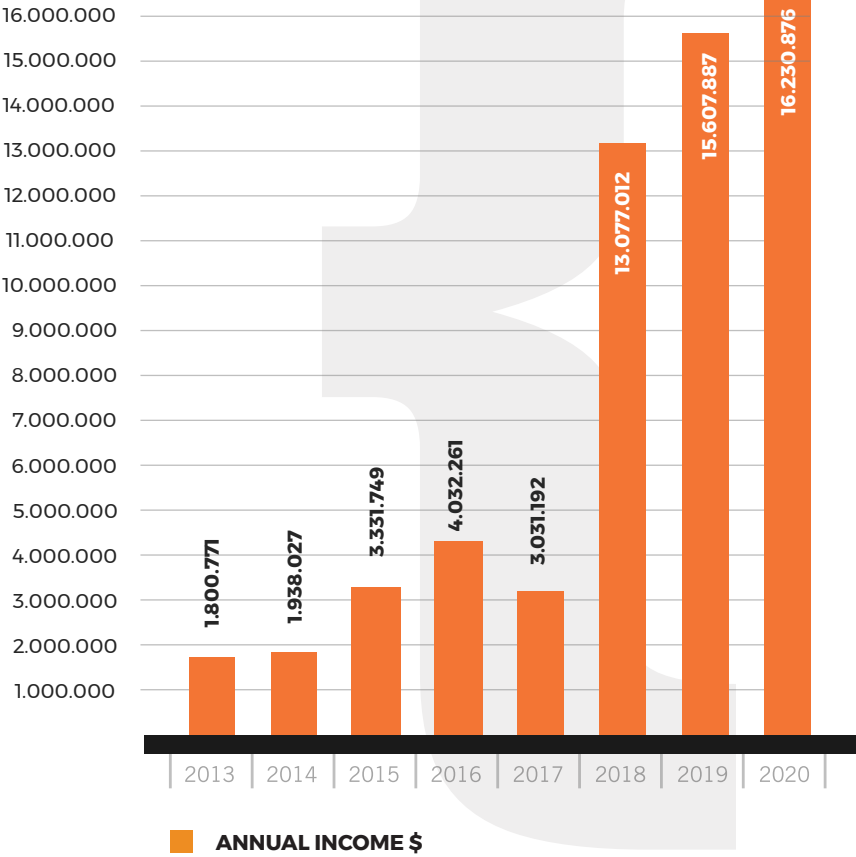

Complexity, legacy systems, huge and expensive IT landscapes make it harder for any enterprise to serve the customer properly and timely. Tons of repetitive activities need to be executed across various applications. We can put an end to this pain and relieve your people from repetitive tasks.

AI

Data improves our knowledge of customer needs. Big data can give us more insight and help us make data-based decisions, allow us to personalize and contextualize our offer, including customer feedback and help us improve our communication with the customer in real-time and ultimately provide exceptional service.

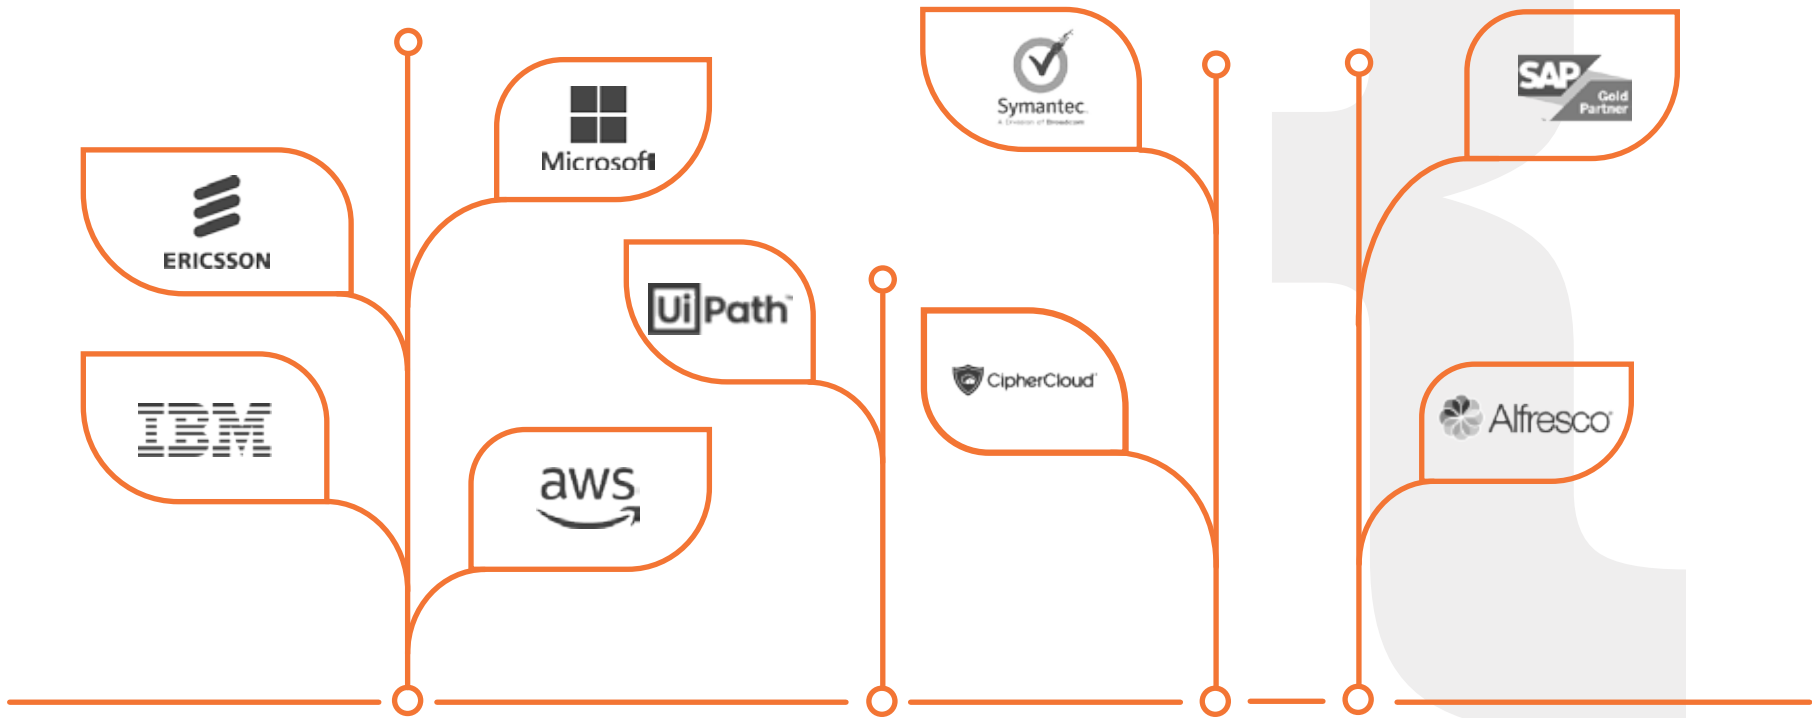

OUR GROWTH

OUR GROWTH

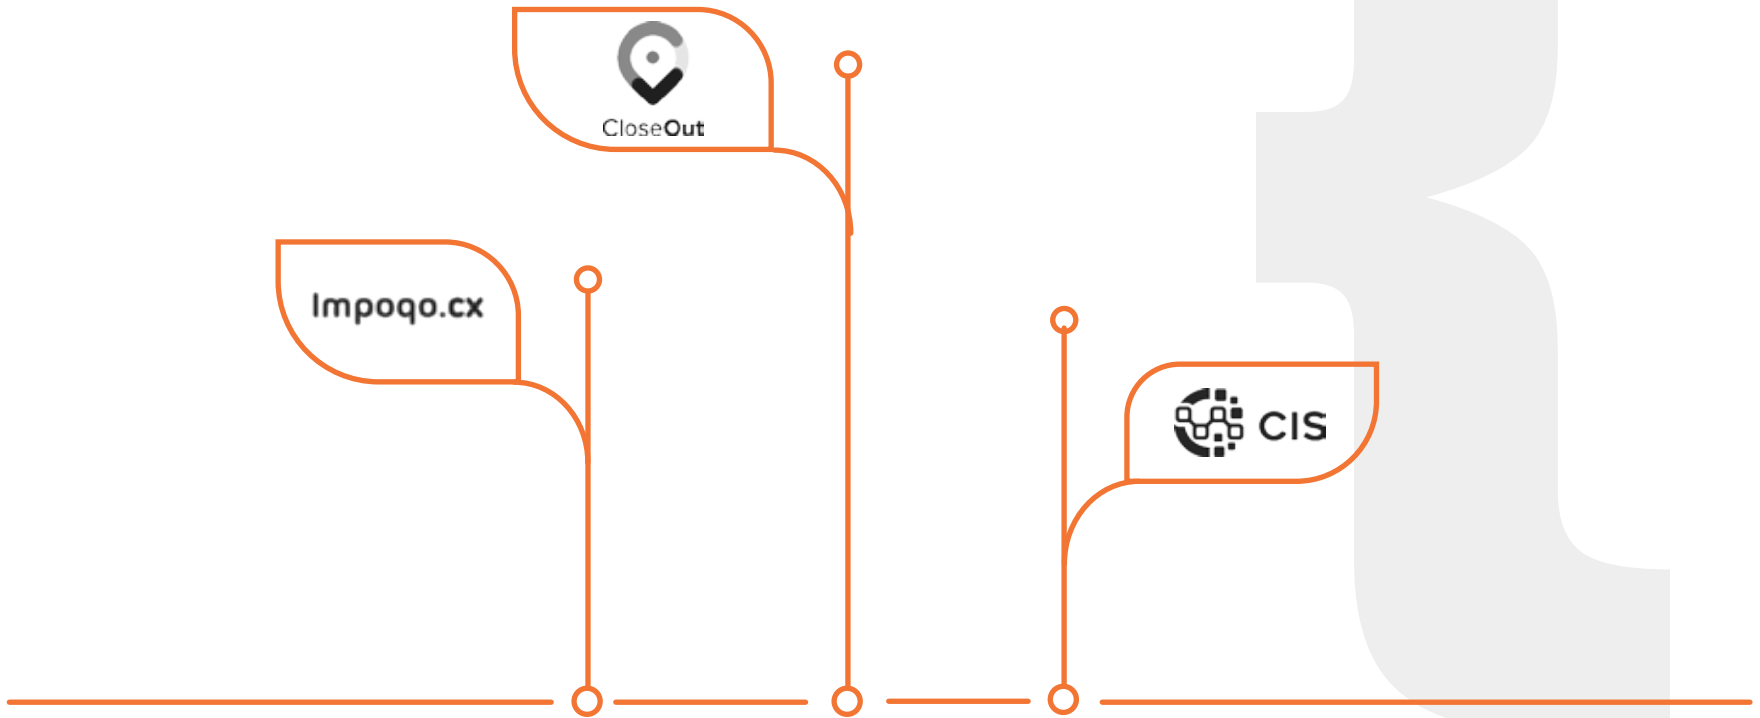

PARTNER SOLUTIONS

Our credibility is proven within our long term and trustful partnerships.

OUR PRODUCTS

We carefully and proudly grow our in house products for digital era!

DATA SCIENCE

Rapid technological development, creates a new generation of leaders who embrace new technologies, based on machinelearning and additional data sources.

Enetel Solutions helps you become a part of this generation, by using a number of significant benefits these echnologies create:

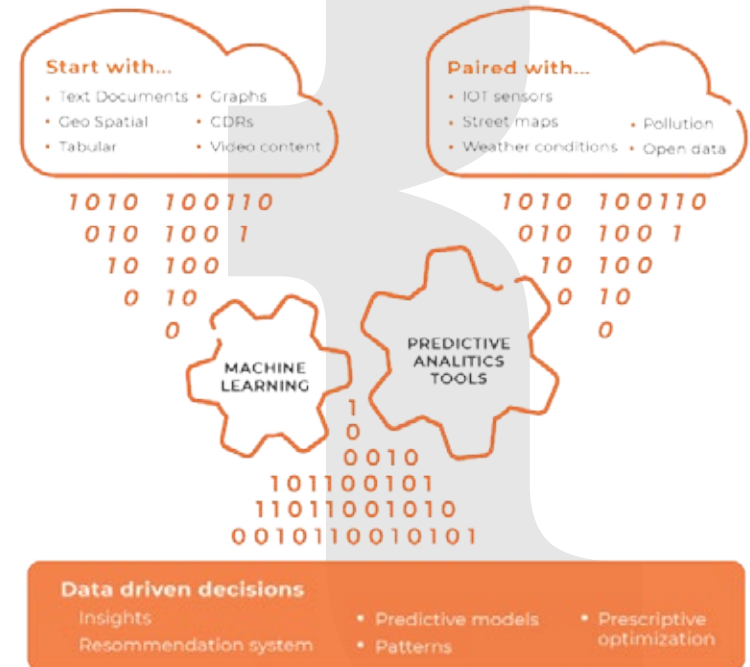

Easier, faster, and automated creation of innovative products and additional functionalities, as well as personalized advertising and communication

Exceeding customer expectations for individualization and dynamic product adaptation

Simplification of the process / internal procedures and reduction of dependent expenditures

Historical data can be converted to useful insights such as in sports. Current AI models are implemented in tennis, basketball golf. Give players, coaches, and referees valuable feedback on historical matches

Let us become Your partner on a journey from Data Wasteland to harvesting Insights from the Data Jungle!
