SOLUTIONS

The Smart Way to Keep Passengers Informed

Audio and visual passenger communication platform for rail, air and road transport.

AVIS is a centralized audio-visual information system that ensures passengers always receive accurate, timely and synchronized information - across every station, platform and channel.

One system.

One source of truth.

Everywhere.

Real-Time Information

Clarity

Consistency

Key Capabilities

Real-Time Information

Instant updates on arrivals, delays, platform changes and alerts

Synchronized Communication

Audio announcements and displays always aligned

Advanced Text-to-Speech

Natural, multilingual voice messages

Centralized Control

Full system management from a single dispatcher interface

Flexible Integration

Works with your existing infrastructure

Public Safety Alerts

Instant broadcast of missing child alerts across all displays and audio systems - reaching thousands of passengers in real time

THE CHALLENGE

Passengers expect instant and reliable information.

Operators struggle with:

- Inconsistent announcements
- Delayed updates
- Multiple disconnected systems

Without a centralized solution, communication becomes unreliable and operationally complex.

"AVIS enables us to deliver accurate and timely passenger information, improving communication and operational efficiency."

Railway Infrastructure of Serbia

THE SOLUTION - AVIS

AVIS centralizes all passenger information into a single intelligent platform that:

- Synchronizes audio and visual communication
- Delivers real-time updates automatically
- Integrates with existing transport systems
- Ensures consistency across all channels

“Managing passenger information across multiple stations was a complex operational task. We needed a system that could provide clear, consistent and real-time updates for passengers.”

Railway Infrastructure of Serbia

AVIS in action

Situation

A train is delayed and platform changes minutes before arrival

AVIS Response

Automatic update across all displays + synchronized announcements.

Result

Passengers receive clear instructions instantly - no confusion, no stress

Why Transport Operators Choose AVIS

- Improved passenger satisfaction through accurate information
- Reduced operational workload through automation
- Increased efficiency of passenger flow
- Enhanced safety with automated emergency alerts
- Full compliance with EU accessibility standards
- Centralized monitoring and control
